

Distribution of Refugees in Europe

First and simple proposal for a fair distribution of refugees within the EU.

The European Union is not a musical request programme. It is not a leisure club where anyone can drop by from time to time and pick out the raisins.

Every country in the EU has not only rights but also obligations. The synergies resulting from an EU membership are caused by community. In this community will be given and received. Problems are solved commonly, overcome obstacles together and borne the burden by all.

Therefore it is unacceptable that any country denies his part of responsibility by common solution for the today's refugee's questions. A simple distribution key as following has to be accepted and agreed by all member states of the European Union.

As a proposal and to show how easy it could be, we have developed a mandatory essentials distribution key for the EU countries, which is based on the following parameters: population, GDP, economic growth, unemployment, budget deficits and total debt: (* = RRK = Refugee Relation Key)
